

INTERNATIONAL CIVIL AVIATION ORGANIZATION

**AFI PLANNING AND IMPLEMENTATION REGIONAL GROUP
SEVENTEENTH MEETING (APIRG/17)
(Burkina Faso, 2 to 6 August 2010)**

Agenda Item 5: Status of implementation of SP AFI/08 RAN Meeting recommendations and follow-up

PROGRESS ON THE IMPLEMENTATION OF THE SPECIAL AFRICA-INDIAN OCEAN REGIONAL AIR NAVIGATION MEETING RECOMMENDATIONS

(Presented by the Secretariat)

SUMMARY

This Special Africa-Indian Ocean Regional Air Navigation (SP AFI/08 RAN) Meeting, which was held in Durban, South Africa, from 24 to 29 November 2008, was the first ever dealing with issues not directly related to the regional air navigation plan. It focused primarily on safety issues and on monitoring the progress of the AFI Comprehensive Implementation Programme (ACIP). This paper presents the status of ongoing efforts by States, the Secretariat and the AFI Planning and Implementation Regional Group (APIRG) on the implementation of the SP AFI/08 RAN Meeting recommendations

Action by APIRG/17 is contained in paragraph 3.

1. INTRODUCTION

1.1 The Special Africa-Indian Ocean Regional Air Navigation (SP AFI/08 RAN) Meeting held in Durban, South Africa, from 24 to 29 November 2008 was deemed special because it not only addressed issues relating to the regional air navigation plan but also focused on safety issues and on monitoring the progress of the AFI Comprehensive Implementation Programme (ACIP). The meeting was divided into separate Safety and Efficiency Committees. It should be noted that many of the recommendations of the Efficiency Committee were safety related, as this Committee, in addition to efficiency, also addressed the safety of air navigation, while the Safety Committee addressed issues primarily related to flight safety. Additionally, efficiency improvements cannot be addressed without considering the safety of such improvements at the same time.

1.2 While the SP AFI/08 RAN Meeting did not indicate a priority for addressing or completing each recommendation, the Council noted that the performance-based approach and progress measurement methodologies adopted by the meeting would provide a baseline for stakeholders in the region to utilize when prioritizing activities within their sphere of concern. The Council was apprised that performance framework forms (PFF) were an effective management tool for the implementation of various recommendations. Also, the Council requested that the Air Navigation Commission present a progress report on the implementation of the SP AFI/08 RAN Meeting recommendations for its

consideration and submission to the 37th Session of the Assembly. It should be noted that the follow-up to all efficiency recommendations will be handled by the AFI Planning and Implementation Regional Group (APIRG) on a continuous basis while many flight safety issues will be addressed by the newly formed Regional Aviation Safety Group – Africa (RASG-AFI) and ACIP. The Appendix to this working paper contains an action plan that indicates the following:

- a) the current status of implementation by States, the Secretariat and APIRG of the SP AFI/08 RAN Meeting recommendations;
- b) specific target dates for implementation in relation to each recommendation;
- c) categorization of the recommendations in terms of short- (2010-2011), medium- (2010-2015) and long-term (ongoing) projects;
- d) challenges being encountered in the implementation of recommendations; and
- e) identified accountability for each recommendation.

2. CONCLUSION

2.1 A number of significant initiatives developed by the SP AFI/08 RAN Meeting are aimed at improving safety and efficiency within the AFI Region. The meeting identified fundamental principles which could have medium- to long-term impact on the AFI Region States' safety culture. The SP AFI/08 RAN Meeting did not specifically address required resources to follow-up on the recommendations. Instead, it focused on the critical safety and efficiency needs of the region. Some of the recommendations, however, call for comprehensive work programmes which may require a substantial effort by States with consequential financial impact. The Council advises that efforts should be made to identify funding sources. In this regard, a clear distinction should be made between funds needed by ICAO for ACIP-related projects and funds required for implementation of these projects by States or groupings of States with the support of donors. In the field of safety, ACIP, Regional Offices and Headquarters are called upon to provide resources. In this regard, support from the global community is essential for the successful implementation of all of the recommendations which would lead to improved aviation safety in the AFI Region. In the meantime, the Council will continue to actively monitor the implementation of the recommendations through the reports of APIRG and the RASG-AFI.

3. ACTION BY APIRG/17

3.1 The meeting is invited to:

- a) note and update the current status of implementation of SP AFI/08 RAN Meeting recommendations;
- b) analyze, in coordination with States, the Action Plan in the Appendix hereto and determine resource requirements for the States for its implementation;
- c) identify funding sources for the States for the implementation of the Action Plan; and

- d) encourage Stakeholders to support States in the implementation of the SP AFI/08 RAN Meeting recommendations.

APPENDIX

ACTION PLAN FOR IMPLEMENTATION OF SP AFI/08 RAN RECOMMENDATIONS

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
3/1	ICAO involvement in the implementation of civil aviation projects Long-term project	ICAO will continue to involve itself in national/regional civil aviation projects through the Technical Co-operation Bureau (TCB). New projects, addressing safety issues especially with regard to the implementation of USOAP Corrective Action Plans, have been initiated with a number of States. The initiatives are undertaken on a continuous basis.	Harmonized and integrated national/regional civil aviation projects to assist States in achieving compliance with ICAO SARPs	Lack of funding; lack of awareness of aviation priorities at high level in most States; and lack of political will to support aviation projects	States ROs TCB	Implementation on continuous basis
3/2	ACIP programme implementation Long-term project	ACIP has established communication links with all States in the AFI Region. ACIP communicates its programme of activities using direct communication (e-mails, letters, etc.) and through the ACIP website. ACIP activities and programmes are also published in African aviation media and the ICAO main website.	Enhanced aviation safety	Limitations of technology available in States and among stakeholders	States ACIP ROs	Implementation on continuous basis
3/3	Performance-based approach and measurement Short-term project	In April 2010 APIRG subgroups undertook further work to develop performance objectives initiated by the SP AFI/08 RAN Meeting related to ATM, AIS/MAP, SAR and CNS fields. Under the special implementation project	Performance-based regional air navigation planning and implementation	Resources needed to assist States to understand and implement the concept	ROs ICAO HQ	2011 2010

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
		(SIP) mechanism, a regional performance framework workshop will be held in December 2010 with the objective to develop a regional capability to undertake planning for air navigation systems using the performance framework forms (PFF).				
4/1	Implementation of the safety critical elements Long-term project	The eight critical elements are addressed during the gap analysis with States. To date more than 90% of States have been covered. Additionally, these elements have been addressed through the universal safety oversight audit programme (USOAP).	Well organized civil aviation regulatory framework with a comprehensive civil aviation safety system	Assistance to States is hampered by limitations in resources in ROs	States ROs	Implementation on continuous basis
4/2	Improved oversight Short- to medium-term project	Support was provided to the Banjul Accord Group (BAG) member States to establish a Regional Safety Oversight Organization (BAGASOO), which became operational as of 1 May 2010; a regional organization framework was developed for the Economic and Monetary Union of West Africa (UEMOA) member States and Mauritania (February 2010) and expected to be operational by December 2010; a consultation with the Central African Economic and Monetary Community (CEMAC) States and Sao Tome and Principe was completed (February 2010). An agreement was reached with the	Regulatory oversight system in place	Bottlenecks in some Regional Economic Communities (RECs)	States ACIP ROs TCB	BAGASOO operational as of 3 May 2010 UEMOA and Mauritania framework agreement is scheduled to be signed in 2010 Consultation with CEMAC States and Sao Tome and Principe are

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
		<p>Partner States of the East African Community (EAC) on the provision of support to the Civil Aviation Safety and Security Oversight Agency (CASSOA), to enhance its effectiveness as a Regional Safety Oversight Organization (RSOO) for the EAC Partner States. ICAO ESAF Office is actively engaged in providing guidance and assistance to CASSOA in this respect. A two week workshop on development of harmonized guidance material was held at the ESAF office led by the ESAF RO Flight Safety in coordination with the Technical Working Group of CASSOA. In addition ESAF is actively pursuing the establishment of a Regional Centre for Aviation Medicine under the umbrella of the CASSOA for the EAC partner States. A gap analysis has been completed for the Southern African Development Community (SADC) States and a meeting with the Directors General to determine priority projects is scheduled in the fourth quarter of 2010.</p> <p>Regional Office Safety Teams are responsible for the follow-up on the technical support being provided to the RSOOs and COSCAPS to ensure</p>				<p>expected to start in 2010</p> <p>Development of harmonized guidance material for CASSOA completed</p> <p>The feasibility study on the establishment of a Regional Centre for Aviation Medicine was completed and will be presented to the CASSOA Board for approval in third quarter of 2010.</p> <p>Support to CASSOA to be completed by December 2010</p>

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
		sustainability of accomplishments				
4/3	State safety programme Medium-term project	State safety programme (SSP) training courses were provided to all States in the AFI Region; regional safety programmes were developed as part of the establishment of the RSOOs; and integrated safety management (ISM) courses were provided to States as a tool to use in the development of their SSPs. Regional Office Safety Teams are responsible for the follow-up on the implementation of State Safety Programmes.	SSPs are established and safety is improved	Limited follow-up by States to implement proposed programmes	States ACIP ROs	AFI regions expected to have a regional safety programme by end of 2010 All States expected to have developed their SSPs by July 2012
4/4	ADREP/ECCAIRS implementation Long-term project	ACIP conducted two Aviation Incident Reporting System (ECCAIRS) courses for European Co-ordination Centre in 2009. ECCAIRs technical staff conducted end user course in Lusaka Zambia from 17 to 27 May and was attended by Zambia, Angola, Zimbabwe, Botswana, Kenya, Uganda and Mauritius. Regional Office Safety Teams are responsible for the follow-up on the conduct of ECCAIRS courses	Establishment of regional safety database and access to safety data	Further adequate reporting culture; lack of follow-up by States and stakeholders	States ACIP ROs	Implementation on continuous basis
4/5	Establishment of regional accident investigation	As part of the support provided for the establishment of the RSOOs, ACIP also developed organizational, legal and	Effective and independent incident and	Bottlenecks in some RECs	States ACIP ROs	September 2010 (BAG)

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
	organizations Short- to medium-term project	<p>financial frameworks for the establishment of regional accident investigation agencies (RAIA).</p> <p>The BAG member States have established RAIA (operational as of September 2010); a framework agreement for the establishment of RAIA for UEMOA member States and Mauritania has been developed and will be signed at the appropriate level.</p> <p>Consultation with the East African Community (EAC) Partner States leading to the establishment of the EAC Accident Investigation Agency was held in April 2010 and for the CEMAC member States and Sao Tome and Principe was held in July 2010. Processes for the establishment of an RAIA in SADC States will follow the determination of priorities by the Directors General at the completion of the gap analysis. Two AIG training courses (English and French) were delivered in 2010.</p>	accident investigation		TCB	<p>December 2010 (UEMOA)</p> <p>March 2011 (CEMAC)</p> <p>July 2011 (EAC)</p> <p>September 2011 (SADC)</p> <p>Training courses are held on continuous basis</p>
4/6	Investigation of air traffic services incidents and provision of comprehensive	The regional offices forwarded the report of the Air Traffic Services (ATS) Incident Analysis Group (AIAG) - 2009 to States and urged follow-up action and investigation of incidents as well as	Effective and independent incident investigation	Lack of follow-up by States and stakeholders. In some cases, States are	TAG States	Implementation on continuous basis

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
	feedback to parties involved Long-term project	feedback. In addition to the AIAG meetings, the Tactical Action Group (TAG) started in July 2009 requested States and airlines to investigate unsatisfactory condition reports (which are inclusive of ATS incidents) and to provide feedback. The two mechanisms are to be continued. TAG/2 convened on 23 and 24 April 2010. Also, see remarks on Recommendation 6/7.	Sharing of safety information	delaying to accept assistance missions.		
4/7	Reporting of air traffic services incidents Long-term project	The TAG mechanism has been used effectively to follow-up on incident reports that came mostly through electronic reporting. ATS/AIS/SAR SG/11 meeting held in April 2010 reviewed the usage of the ICAO model incident report format in Doc 4444, Appendix 4 and undertook to make it more user-friendly.	Implementation of just culture through encouragement to airline operators to report incidents. More regular reporting, particularly by air traffic controllers and flight crew.	Lack of follow-up by States and stakeholders. In some cases, States are delaying to accept assistance missions.	ATS/AIS/SAR SG Airline operators IATA	Implementation on continuous basis
4/8	Implementation Support and	States were made aware of the possibility of ISD to assist with rectifying safety	Assistance to States to resolve	Lack of sustainable	ICAO HQ	Implementation on continuous

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
	Development (ISD) programme Long-term project	oversight deficiencies and to promote the establishment of partnerships.	safety oversight deficiencies.	funding		basis
4/9	The COSCAP Programmes in Africa Short- to medium- term project	Existing COSCAPs are being monitored by the regional offices on a continuous basis. Transformation of the COSCAPS into RSOOs is being accomplished with the assistance of ACIP. See Rec. 4/2	Establishment of safety organizations to support States civil aviation safety systems.	Lack of sustainable funding for some of the COSCAPS which is likely to continue for RSOO	TCB ROs ACIP	2011
5/1	Regional safety planning methodology Medium-term project	Gap analyses were conducted for 46 States in March 2010; remaining States to be completed by third quarter of 2010; maturity levels have been identified, priority projects determined and action plans developed. Support is being delivered at all levels.	Integrated and harmonized safety planning	See Recs. 4/2 and 4/9	ACIP ROs States	Gap analysis completed 2011 – all action plans will be finalized and activities will be launched 2012 – second round of gap analysis will be undertaken to assess progress made
5/2	Commitment to government and industry cooperation	The SP AFI/08 RAN was convened in the spirit of the need for collaboration between the States and industry to address safety issues.	Consistent coordination with all stakeholders	Limited cooperation between Government and	ICAO States Stakeholders	Implementation on continuous basis

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
	Long-term project	To further enhance coordination with the Industry, RASG-AFI has been established.		industry		
5/3	Safety oversight capability Short-term project	In most cases, the gap analyses indicate that States are not in a position to establish and maintain an effective and sustainable safety oversight system; therefore, most States have agreed for the establishment of a RSOO as a priority action. ACIP is actively supporting the establishment of RSOOs and RAIAAs (see Rec. 4/2 above).	Participation of States in the RSOO	There is a need to assist States in addressing significant safety concerns to implement the SOA approved close approach probability (CAP) in a timely manner. Some States could be assisted in implementation efforts by offering short-term assignments pending the establishment of RSOOs and TCB projects. In this regard the regional offices	States ACIP ROs	Same as in Rec. 4/2 above

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
				are constrained due to shortage of personnel.		
5/4	Establishment of regional aviation safety groups Short-term project	The Council, in May 2010, established regional aviation safety groups (RASGs).	Enhanced civil aviation safety environment	Nil	ROs States Industry	Completed
5/5	The ICAO technical cooperation programme for the AFI Region Long-term project	TCB is developing procedures to assess customer satisfaction with the TC projects and identify areas that require improvements.	Efficient and satisfactory implementation of ICAO projects	DGCA/3 meeting, held in November 2009, expressed concern on the quality of consultants selected by TCB for various ongoing projects in the region and requested ICAO to improve the selection process to ensure that candidates selected have the required qualification and experience.	TCB ROs	Implementation on continuous basis

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
5/6	Support to States in relation to their oversight responsibilities Long-term project	Ongoing support is provided during ICAO missions. During the DGCA/3 Meeting held in November 2009, a Quarterly Report by States on actions undertaken to correct identified deficiencies had been agreed to. State letters were issued by the two regional offices encouraging States to report progress.	Enhanced safety oversight by CAAs Feedback is expected from States	Limited response to State letters; States are encouraged to increase sending replies as soon as possible	ROs States	Implementation on continuous basis
5/7	Development and implementation of a regional safety reporting tool Medium-term project	Training on ECCAIRS has been provided and will continue to be provided by ACIP (see 4/4 above). States were encouraged to implement the ECCAIRS/ADREP tool as part of the training provided. Workshops on ECCAIRS were conducted in Luanda/Angola, Lusaka/Zambia and Harare/Zimbabwe and these workshops were well received by all participating States. In addition the ESAF Office will be conducting, by end of 2010, two ECCAIRs reporting system training courses, one in Nairobi, Kenya and other one in Dubai on cost recovery basis for WFP operators sponsored by the WFP.	Regional safety database and access to safety data	Further adequate reporting culture; and ensuring follow-up to implement and utilize the systems	States ACIP ROs	Reporting tool to be implemented in all AFI States by 31 December 2012
5/8	Training strategies for aviation safety	The First Pan African Training Coordination Conference was organized	Appropriately trained and	Lack of commitment by	States ACIP	December 2010

	assistance provided Long-term project	subregional group meetings.	assistance programme towards resolution of aviation safety deficiencies	information on proposed and ongoing programmes		basis
5/10	ACIP work programme Medium- to long-term project	The ACIP work programme adopted by the SP AFI/08 RAN Meeting is currently being implemented and any changes are communicated to States and published on the ACIP website.	Adoption of ACIP work programme	See Rec. 3/2	ACIP	ACIP activities are to be transferred to ROs by January 2011. Activities will be ongoing until December 2015
5/11	Gap analysis Medium-term project	Results of the gap analysis are initially reviewed at the State level by the team that had conducted the gap analysis and later at the regional level with the Directors General of Civil Aviation and will be used to determine priority of the projects. Such reviews have led, at State level, to the development of a support mission by the Regional Office Safety Teams (ROST) and, at the regional level, the development of organizational, legal and financial frameworks for the establishment of RSOOs and RAIAs. Priority projects at the regional level were determined: BAG (Oct 2008), UEMOA (March 2009), EAC (August 2009), and	Full implementation of priority projects at the regional level	Bottlenecks and poor follow-up of decisions by States	ACIP ROs States	BAG States, December 2010 UEMOA States and Mauritania, July 2011 CEMAC States and Sao Tome & Principe, December 2011 EAC Partner States, July 2011

		objectives pertaining to the CNS domain. These PFFs will be reviewed at the APIRG/17 meeting.				
6/2	National performance framework Short-term project	AFI States will receive further guidance through the ICAO workshop planned for December 2010.	National performance framework for air navigation systems	Lack of awareness of the performance based approach concept	ROs States	2011
6/3	Reorganization of the regional air navigation plan Medium-term project	ICAO is developing eANPs which will ensure alignment with the Global Air Navigation Plan	Harmonized regional eANPs	Need to build awareness on this concept in States; and availability of funding for its implementation	ICAO HQ	2013
6/4	Re-organization of APIRG Short-term project	In order to facilitate coordination and reduced duplication, the Secretariat and the ATS/AIS/SAR Subgroup, have commenced the consolidation of activities. This includes immediate convening of joint meetings, back-to-back events and proposals to APIRG to merge some subsidiary bodies. In addition, consolidation is expected to broaden the awareness of State officials and to allow for more efficient use of travel budget. For the first time, the ATS/AIS/SAR SG and CNS SG were convened the same	Reorganized APIRG to deliver on regional performance framework	Nil	ROs APIRG and subsidiary bodies	2010

SP AFI/08 RAN Rec./Task		Action taken/planned	Outcome	Challenges	Responsible Stakeholder	Target Date
No.	Title					
		week in adjacent rooms in order to enhance coordination. The two groups had one joint session and resulted in effective outcome.				
6/5	Implementation of new ICAO model flight plan form Medium-term project	Survey by the regional offices is under way to determine the number of States using/or planning to use the automated flight plan processing systems, as well as to ascertain their progress towards enabling the processing of the new flight plan form. A task force to address issues related to the transition to the new flight plan has been established. The task force formally adopted by APIRG. AFI Flight Plan Transition Task Force (FPLT TF) is to meet before end of 2010. Relevant PFF also updated and submitted to APIRG.	Implementation of new flight plan form	Lack of awareness of the performance based concept Limited response by States to regional office survey Limited funds to conduct workshops	ROs APIRG States	November 2012 Update from States and further guidance on FPL at APIRG/17 meeting
6/6	Operational safety assessment methodology Short-term project	APIRG/17 meeting adopted a safety assessment methodology.	Adoption of safety assessment methodology	Limited funds to provide guidance and conduct workshops	ROs APIRG States	2010
6/7	Establishment of a Tactical Action Group (TAG) Short-term project	The TAG held its first meeting in May 2009 and discussed its terms of reference and work programme. Teleconferences have been relatively successful and are planned for every two weeks. These meetings have been facilitated by the use of low-cost internet teleconferencing	Resolution of UCRs	States' limited support to the TAG mechanism Lack of response by States to TAG inquiries	ROs APIRG' TAG	First TAG Report to APIRG/17 meeting in 2010 Electronic incident

	procedures office Short-term project	<p>Office (FPO) in the APAC Region, has provided information and experience indicating that one FPO be established at a time. Consequently, the joint meeting of the PBN and GNSS Task Forces, 8 to 10 September 2009, suggested that ICAO delay dissemination of a letter inviting States to submit proposals for the establishment and hosting of the AFI FPO.</p> <p>The AFI ATS/AIS/SAR SG/11 meeting 26 to 30 May 2010 was of a strong view that the AFI FPP should not be delayed further and the letter inviting interested States to make proposal to host and support the FPP, should be circulated immediately. Accordingly, the letter was circulated in June 2010.</p>				<p>APAC FPO has just been established, the Secretariat has been requested to expedite the establishment of a similar FPO for the AFI Region</p> <p>Implementation to be guided by experience gained in establishing APAC FPO</p>
6/11	Implementation of WGS-84 and eTOD Long-term project	<p>The fifth meeting of the AFI AIS/MAP/Task Force held in Dakar in May 2009, pursued follow-up actions and provided States with guidelines/strategies for the implementation of world geodetic system-1984 (WGS-84), eTOD and the elimination of AIS/MAP deficiencies.</p> <p>The Third Regional AIM Congress highlighted the AFI Region's transition roadmap of AIS to AIM.</p>	Implementation of WGS-84 and eTOD	<p>Limited exposure of AIS/MAP staff to appropriate knowledge and skills</p> <p>Limited funds available to States for the implementation</p>	ROs APIRG States	<p>Implementation on continuous basis</p> <p>Update at APIRG/17 meeting</p>
