5LNCs status

On-line status of codes:

- blue codes are available
 - <u>Underlined 5LNCs</u> = active and available for your region
 - the authorised user selects and proceeds with the request
 - If not active (not underlined) = available but belongs to another region
- orange codes action is being processed
- red codes are already allocated

Sound-like proximity is mandatory

- 500 NM is the radius currently determined as safe for a sounding like proximity
- Checking sound like proximity is the responsibility of the route planner
 - The route planner will check the adequacy of the results obtained with the « list » function
- The data manager will refuse requests that are not safety checked and confirmed.

Sound like check proximity –list view
