

INTERNATIONAL CIVIL AVIATION ORGANIZATION
Western and Central African Office
Workshop on the Interconnection of Aeronautical Surveillance Systems
(Dakar, 14 – 16 April 2014)

DRAFT AGENDA

Agenda Item 1: Overview of aeronautical surveillance systems technologies

Under this agenda item the workshop will review the technologies that are candidates for air navigation surveillance with focus on the latest developments.

Agenda item 2: Update on the regional aeronautical surveillance strategy and plan

Under this agenda item the workshop will review the provision of the regional Aeronautical surveillance strategy and plan as approved by APIRG meetings with emphasis on the Collaborative Decision Making principle in line with the guidance contained in the Global Air Navigation Plan (GANP Doc. 9750)

Agenda Item 3: Review of the current Surveillance Systems in the AFI Region

Under this agenda item the workshop will review the status of implementation and assess the current development of aeronautical surveillance systems within the Region with focus on the operational benefit that can enable a safer and more efficient ATM service provision whilst ensuring a seamless surveillance service through effective interconnection of surveillance systems.

Agenda Item 4: Trials and implementation actions on aeronautical surveillance systems interconnection in other ICAO Regions

Under this agenda item the workshop will review Trials and Implementation actions conducted on Aeronautical surveillance systems interconnection in other ICAO Regions with focus on the improvement gained from such interconnection.

Agenda Item 5: Interconnection of Aeronautical surveillance systems in the AFI Region

Under this agenda item the workshop will examine the opportunity and challenges for Aeronautical Surveillance systems interconnection and data exchange with regards to the currently available and future developing aeronautical surveillance technology.

Agenda item 6: Operational benefits expected from the interconnection of aeronautical surveillance systems

Under this agenda item the workshop will examine the operational benefits expected from the interconnection of surveillance systems within the region from both airlines and ANSPs perspectives.

Agenda Item 7: Development of an aeronautical surveillance systems interconnection scheme for the AFI Region

Under this Agenda Item, the workshop will develop a scheme for the interconnection and interoperability of aeronautical surveillance systems for the AFI Region.

Agenda Item 8: Future development on aeronautical surveillance systems interconnection

Under this agenda item the workshop will be briefed on the future technical developments on surveillance systems as outlined by the ICAO 123th Air Navigation Conference. The industry will also be invited to present the trend in the evolution of the technology governing aeronautical surveillance systems interconnection.

Agenda Item 9: Any other business

Under this Agenda Item, the workshop will consider other issues of interest (if any) not included in the previous Agenda Items.
