

Team Uganda

Things to Take Home from CAPSCA Training

- Push for putting in place a legislation for protecting the airport authority/airline in case someone sues for delay or missing of flight
- Carry out update training of the screening team using the e-learning tool
- Train the airport non-medical staff in conducting primary screening (to cater for exit screening)
- Exit screening will occur when we have an outbreak of EVD in the country
- Aircraft with a suspected case will park at the usual nearby parking
- Review our airport emergency plan and update SOPs
- Carry out regular table top drill to simulate a public health emergency
- Plan for IHR certification
