

GOLD/PBCS/Data Link Monitoring Activities Workshop September 11-15, 2017 in Dakar, Senegal

PBCS Group Exercise Activity – Group Collaboration

[P12 Implementation of PBCS Manual_ Appendix A_revised 10-3-17.pdf](#)

This presentation was delivered by an FAA facilitator, outlining the Implementation requirements of the PBCS Manual -Appendix A.

*Following that presentation, the workshop attendees participated in a Group Exercise with the objective of outlining an AFI PBCS Implementation Plan. This plan was presented to ICAO for the purpose of supporting an ICAO initiated Working Paper (WP) to be presented to APIRG/21 during October 9-11, 2017 in Nairobi, Kenya.

[P12B APIRG12 PBCS Task Sheet for Implementation_Blank.docx](#)

This document is a blank PBCS Task Sheet to use for the Group Exercise.

[P12C Group Exercise Working Copy PBCS Implementation 2017 Dakar Senegal V.1.docx](#)

This document is the working copy used during the workshop half-day session in Group Collaboration. Following this session, it was agreed that more work was needed and this was just a beginning draft. There was not enough time in this session to complete a finished product for submission to ICAO. The group agreed to continue to work this PBCS plan after the workshop and to provide feedback to the FAA within a week after the workshop. The submissions would be compiled into one document by the FAA and submitted to ICAO to support an ICAO initiated Working Paper (WP) planned for submission to APIRG/21. This post-workshop agreement with the attendees allowed for the FAA team to continue delivering the planned agenda instead of eliminating any of the curriculum from this workshop in order to complete the PBCS Implementation plan.

[P12D APIRG21 Exercise_Letter to You 2017 Implementaion Group.pdf](#)

This document is a letter presented to the workshop attendees on the final day to encourage them to continue their PBCS implementation work and provide additional instruction on completing the PBCS Implementation Plan exercise within a week following the workshop.

[P12E Post Workshop PBCS Program Implementation 2017 Dakar Senegal_KEN_SEY_SN_V5.docx](#)

This document is the final product compiled from the work completed within the workshop along with the additional post-workshop submissions. This information was provided to ICAO for the purpose of supporting an APIRG/21 WP.
