Module d'Echange et de Télétransmission avec les ORganismes

The application of supervisory authorities

FRANCE AVIATION CIVILE SERVICES
Expertise and Consultancy Office of the French Civil Aviation

METEOR Objectives

A single internet platform shared between the supervisory authority and the operators and compatible with all disciplins in order to :

- Facilitate exchanges for the planning of surveillance acts, the follow-up of findings or any other dossier

- Centralize information

- Dematerialize data and exchanges between the authority and organizations and trace them

FRANCE
AVIATION CIVILE
SERVICES
Expertise and Consultancy Office of the French Civil Aviation

A tool created by a supervisory authority

- The DSAC is the competent French authority for supervision and certification in civil aviation

- Application developed by the DSAC in 2019 to lighten the tasks of staff and allow the continuity of dossier processing in case of absence

- METEOR is more than 820 users on the DSAC side and about 1000 organizations for more than 1,500 external users

METEOR adapts to your organization

Define roles to stick as closely as possible to your organization

<u>On the authority side :</u>

- **Administrator =>** Creates and manages the accounts of the organizations, creates and manages the users of the authority.

- **User** *(inspector or management)* **=>** Sets up his own account, creates monitoring acts, responds to agency requests, records, corrective action plans, generates reports and can create a communication.

<u>On the operator side:</u>

- **Manager =>** Creates users for his organization. Can communicate with the authority.

- **Focal point =>** Creates and edits folders and can send them to the authority.

- **Internal user =>** Creates and edits folders but cannot send them to the authority.
