State’s Obligations

According to the Memorandum of Understanding on the CMA agreed to with ICAO, States shall use the USOAP CMA online framework to continuously update:

1) the State Aviation Activity Questionnaire (SAAQ);  
2) the Compliance Checklists (CCs)/Electronic Filing of Differences (EFOD);  
3) the States’ corrective action plans (CAPs) addressing the corresponding PQ findings; and  
4) the self-assessment of the PQs, including the attachment of all related evidence.

In addition, States shall reply promptly to Mandatory Information Requests (MIRs) sent by ICAO.

Cost-Recovery Workshops

WORKSHOP OBJECTIVES

ICAO schedules USOAP CMA workshops periodically in its Regions.

The main objectives of these workshops are to provide:
• Explanations and latest updates on USOAP CMA; and  
• Guidance on the use of the USOAP CMA online framework.

In addition, States may request these workshops on a cost-recovery basis.

How can a State request a workshop?
• Formally contact the ICAO Regional Office to present its request; and  
• Indicate specific training needs, if any, so that the scope of the workshop can be customized, as applicable.

What is the cost of a three-day workshop?
• US$ 5,000 for the conduct of the workshop + airfare + daily allowance for facilitators.

Universal Safety Oversight Audit Programme (USOAP) Continuous Monitoring Approach (CMA)

Montreal, September 2016
Under the USOAP CMA, ICAO conducts different types of continuous monitoring activities, including audits, ICAO Coordinated Validation Missions (ICVMs) and off-site validation activities:

• **A CMA audit** is an on-site activity in which an ICAO team visits a State to conduct a systematic and objective assessment of the State’s safety oversight system, using a set of Protocol Questions (PQs) for each selected audit area and recommends the issuance of any new findings to address identified deficiencies in the State’s safety oversight system.

• **An ICVM** is an on-site activity in which an ICAO team of subject matter experts visits a State to collect and assess evidence provided by the State to demonstrate that it had implemented corrective actions to address previously identified findings and/or deficiencies. The evidence collected are reviewed and validated at ICAO Headquarters.

• During an **off-site validation** activity, an ICAO team of subject matter experts assesses corrective actions implemented by a State to address previously identified findings related to PQs and which do not require an on-site activity.

Starting from 2018, for States with the most mature safety oversight systems, some of the audit activities will focus on the implementation of the State Safety Programme (SSP).
