ENMIENDA DE LA LISTA DE LA DIVISIÓN 6.1 DE S-7.2.2.2 DEL SUPLEMENTO DE LAS INSTRUCCIONES TÉCNICAS

(Nota presentada por S. Bitossi)

RESUMEN

En esta nota de estudio se pide que se considere la lista de números ONU excluidos para la División 6.1 contenida en la Parte S-7.2.2.2 del Suplemento de las Instrucciones Técnicas para el transporte sin riesgos de mercancías peligrosas por vía aérea (el Suplemento).

Medidas recomendadas al DGP: Se invita al DGP a considerar la creación de un grupo de trabajo para llevar a cabo un examen técnico de la lista completa de mercancías peligrosas de la División 6.1, Grupo de embalaje III, de la Tabla 3-1 (Lista de mercancías peligrosas) de las Instrucciones Técnicas.

1. INTRODUCTION

1.1 In Part 7; 2.1.2 of the Technical Instructions, the State of the Origin and State of the Operator may approve the carriage of certain dangerous goods in the main deck cargo compartments of passenger aircraft, where the aircraft does not meet the requirements of a Class B or Class C cargo compartment.

1.2 This approval is subject to the conditions specified in S-7;2.2 of the Supplement, and more specifically, the approval is restricted to the dangerous goods listed within S-7:2.2.2 (see Appendix A to this working paper).

* Sólo se han traducido el resumen y el apéndice.

1.3 Australia is currently updating its dangerous goods regulations and subsequently, conducted a review of the list of Division 6.1 UN numbers noted within S-7:2.2.2, which are excluded for carriage on a passenger aircraft in a main deck cargo compartment other than a Class B or Class C compartment.

1.4 As part of this update, Australia noted that UN 3283 — **Selenium compound, solid, n.o.s.** (Packing Group III only) is listed as one of the excluded dangerous goods classified as toxic substances under Division 6.1 within S-7:2.2.2. However, UN 3440 — **Selenium compound, liquid, n.o.s.** is not included within this list

1.5 Upon further review, there are potentially other UN numbers which should be reviewed by the DGP for addition to the excluded list within S-7:2.2.2 for Division 6.1.

1.6 The DGP should note that the highest UN number contained within S-7:2.2.2 across all classes and divisions, is UN 3363 (with exception of UN 8000).

1.7 When cross referenced against the list of UN numbers contained within Attachment 1, Chapter 1, Lists of Proper Shipping Names of the Technical Instructions, the highest UN number (aside from UN 8000) is UN 3548. This results in a difference of 180 UN numbers, of which 24 are potentially new Division 6.1 entries.

1.9 Appendix B contains a complete list of UN numbers in Hazard Division 6.1, Packing Group III only, for review.

2. ACTION BY THE DGP

1.1 2.1 The DGP is invited to consider forming an out-of-session working group to review the list provided in Appendix B to this working paper for potential inclusion into the list within S-7:2.2.2 of the Supplement for Division 6.1 (as shown in Appendix A to this working paper).
