to their State regulations and best practices.

Chapter 8 Licensing and competencies manual	Chapter 9 RPAS operations	Chapter 10 Detect and avoid (DAA)	Chapter 11 Command and control (C2) link	Chapter 12 ATC communications	Chapter 13 Remote pilot station (RPS)	Chapter 14 Integration of RPAS operations into ATM procedures	Chapter 15 Use of aerodromes
Annex 1 Personnel licensing Annex 2: 2.2 ROC	Annex 2 Rules of the Air: 1.2, 3.1.9. & Appendix 4 Annex 6 Operation of the Aircraft	DAA is defined in Annex 2 as “the capability to see, sense or detect conflicting traffic or other hazards and take the appropriate action”.	C2 link: the information flows and performance requirements, including quality of service, related to the transfer of data and information between the RPS and the RPA	Annex 10 Aeronautical Telecommunications. The general requirements for ATC communications, to and from the remote pilot, are the same as for manned aviation operating in the same	Annex 8. Part IIIB. The RPS is defined as “... the component of the remotely piloted aircraft system containing the equipment used to pilot the remotely piloted aircraft.” As a general principle, the RPS functions in the same manner as the cockpit/flight deck of a manned aircraft....	Annex 10 Aeronautical Telecommunications Annex 11 ATS RPAS operations should conform to the existing airspace requirements including communication, navigation, surveillance requirements, separation from traffic and distances from clouds.	Annex 14 Aerodromes States will need to determine whether RPA can be safely integrated without presenting new hazards to manned aircraft while evaluating the applicability of applying aerodrome specifications to RPA ops.
