Harmonization Issues

What have we done right in the last few years?

Different

In compliance (standardized)

Equivalent (harmonized)

Same (Mutual recognition)

2000

Rules not in compliance before the establishment of the RAC System

2000-2006

Fast changes in the regulations to fulfill obligations, some standardized RACs were established

2006 -2009

Beginning of the Implementation of the RAC System

2009 -20...

Final Goal, the RAC system is updated and revised periodically

GOAL

B How can we effectively deal with harmonization issues that may continue to exist due to differences among States or regions?
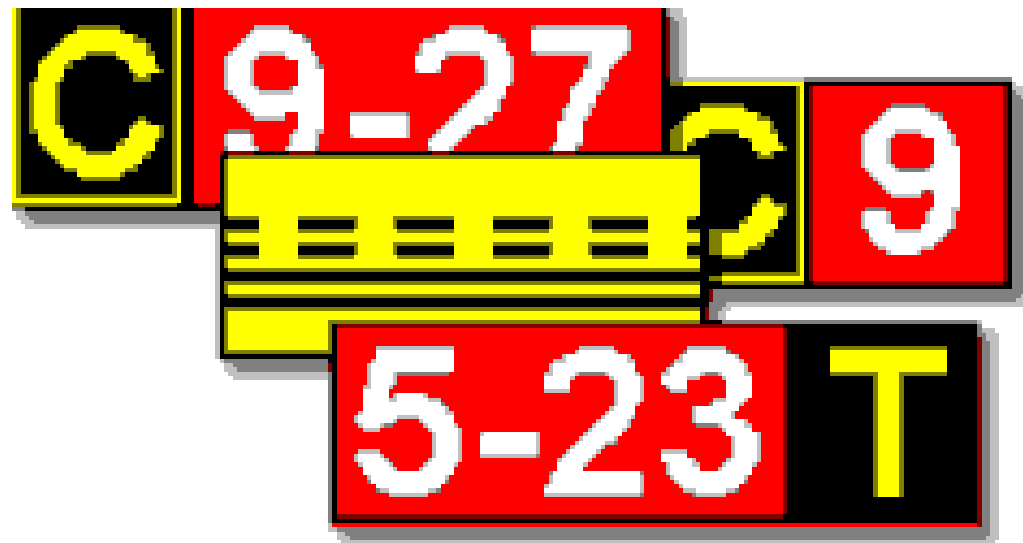

❖ **More analytical requirements are necessary**

➢ **Economical feasibility**

➢ **Technological feasibility**

➢ **Paperwork Burden**

➢ **Impact on small businesses**

➢ **Peer review**

- Cost - effective
- Operative Practices
- Structures
- Culture

CLEAR DECISION RULES FOR HARMONIZATION

1) **Simplification**
2) **Interchangeability**
3) **Specification**
4) **Criteria when some rule or variant should not be harmonized**
5) **Criteria for selecting how to comply (best practices)**
6) **Based on process performance and cost**
7) **Efforts needs to be organized**
