

ICAO

# CAA preparation for restarting operations during a pandemic

## Pandemic Operational Recovery

Lift-off safely and securely into the 'new normal'

To support industry and Civil Aviation Authorities (CAAs) through challenging times, the International Civil Aviation Organization (ICAO) and CAA International (CAAi) have jointly developed a unique virtual classroom course.

Delivered by leading subject matter experts, participants will learn how to navigate compliance, training and operational challenges during the recovery period from a global pandemic.

### ► STRUCTURE OF THE COURSE

Delivery mode: Virtual Classroom/Online Certificate

Duration: 4 days (4 hours per day)

Language of instruction: English

# CAA preparation for restarting operations during a pandemic

The course provides CAA senior and middle managers with an overview of the necessary safety and security oversight and surveillance activities during the recovery phase of a pandemic. It is also particularly beneficial for organisations that have applied for alleviations and exemptions, or significantly reduced their operating scope in terms of size, management infrastructure or complexity, during a pandemic or similar crisis.

The course aims to demonstrate how a CAA can review how its industry has planned and prepared to restart operations. This will include the assessments of the Service Provider's regulatory compliance and safety and security management during the Pandemic contractions and the recovery period. Participants can translate this knowledge learnt for use in their professional environments.

## ▶ LEARNING OBJECTIVES

By the end of this course participants will, via presentation, interactive discussion and a final mastery test of knowledge, skills and attitude be able to demonstrate an understanding of the following:

- Key oversight and surveillance challenges facing industry and the CAA
- How CAA surveillance will need to be adapted.
- Safety risk based surveillance during the pandemic
- Resumption of normal oversight and surveillance
- The management of change process within the organisations' Safety Management System (SMS)

## ▶ WHO SHOULD ATTEND

- CAA inspectors, auditors, senior and middle managers of State's CAAs in charge of operations in the main technical divisions/sections/departments
- Senior industry management personnel involved in operational aviation management

## ▶ KEY TOPICS

- Annex 19 and the State Safety Programme (SSP)
- The impact of a pandemic on CAA staff and CAA oversight and surveillance
- The impact of a pandemic on the aviation industry including its staff and passengers
- Applying a safety risk- based surveillance approach during a pandemic situation
- The impact of a pandemic on Safety Culture

## ▶ PRE-REQUISITES

Participants should be familiar with Safety Management and/or Security Management Systems in a relevant operational environment including a basic understanding of the ICAO SMS framework.

## ▶ DATES AND FEES

Visit our website for available virtual classroom dates and times.

**Cost per participant:**  
USD \$850.00 / £689

▶ **CLICK TO APPLY NOW!**

## ▶ PREPARATION

Participants need to review ICAO Annexes 17 (Security) and 19 (Safety Management Systems) prior to the course.
